Anna-

At this time I am only looking for records pertaining to the addresses listed in the original request (all odd numbered) which was the former Ohio Injector Company. I am aware that Fin Tube also occupied this site at the address of 251 Main Street, which is identified as a ERNS site associated with a release of ammonia from a AST.

The Ohio EPA is providing me files for the Ohio Match Company at 254 Main Street, which adjoins my property to the west. I am holding off requesting files for that site from you as to not get doubles of everything. Depending on what they send me I can put in a limited request to the Region 5 office if needed.

Your request will be assigned to the Land & Chemicals Division (LCD) and the Superfund program (spills..clean-ups) based on a search in EPA databases. The site listed as Ohio Match Co , 254 Main st., Wadsworth ,Oh is also on the Superfund Archived listing, is this the site you are seeking records on or are these addresses separate site? Please clarify the site address.
